

Collaborate

## Collaborate smarter

Collaborate is an exclusive table for group work and meetings. The design, which is inspired by Scandinavia, is both robust and inviting for a conference room, a lounge or a dining room. It can also be used as a standing desk, saving valuable space in small rooms or common work areas. Collaborate is perfect both for conferences, and for quick meetings on your feet.

Whether you need to communicate face to face or remotely, Collaborate is a smart choice. Add power- or IT sockets to work and connect with colleagues whenever you like. The table comes with a plain table top or ready-made with various cutouts, or a stylish table-top hatch, for fitting various accessories. Collaborate is available in more than 50 different sizes, two heights and two types of leg frame. It can be the centrepiece of your room or a practical work surface by the wall.

Choose your leg frame

Great-looking legs are at the heart of the Collaborate personality. In the table series you'll find A-shaped legs in metal as well as A-shaped wooden legs in white-stained ash or lacquered anthracite.

Whether you go for wood or metal will depend on the look and feel you're looking to create, the table top you've picked out, and simply the material you prefer for your décor.

**Leg frames**

- A-shape, wood, white-stained ash or lacquered anthracite
- A-shape, metal, lacquered white, silver or black

## Add your top

Materials set the tone of the workplace and your interior design. The Collaborate table top comes in ash, beech or birch, creating a natural feel. It's also available in white, anthracite and various other materials that can be matched to your colour scheme. Collaborate tops are extra wide and are also modular, perfect for combining in various layouts. This feature is particularly useful for project group seating or for large conference rooms.

## It's all in the form

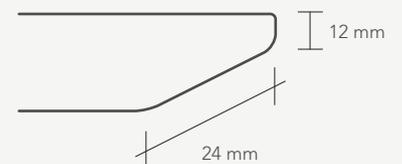

The size and shape of a table is both an aesthetic and a practical choice. Rectangular tables are space-saving and easy to position in a wide range of spaces, for instance in narrow rooms or where you want to place tables in rows.

A large, round table can work well in a conference room or a canteen, while smaller tables can be placed with a sofa or pouffes in a lounge. An oval table softens the aesthetic in large work- or common spaces.

If you need to really maximise your space, Collaborate also comes in some wall mounted models.

Bevelled edge (H)

Straight edge (S)

## Select and order

Collaborate comes with several options. Use the charts on the next pages to help you order your perfect table.

### Check list:

1. Select shape, size and height
2. Select leg frame
3. Select plain top, or top with cable hatch
4. Select top with straight or bevelled edges, and table top material/colour

### When placing your order, supply the following information:

Article number for your table, article numbers for any electrical/IT-accessories

Table top selection (edge S or H, and material/colour).

Leg frame material/colour

## Specify your frame

Choose a metal or wood frame, and the type and material/colour. When specifying the article number, state M for A-shaped legs in metal and U for U-shaped legs in metal.

### Example:

A-shaped metal legs = TCM721480

A-shaped wood legs\* = TC721480 \*Wood legs are only A-shaped.

## Dimensions and finish of metal frame

Optional finish

## Dimensions and finish of wood frame

### Optional finish

## Cable hatches

Cable hatches are available as an option for most table tops with a bevelled edge (H). Hatches in A2 and B5 can be chosen for table tops in the same material. Lacquered hatches can be used on all table tops.

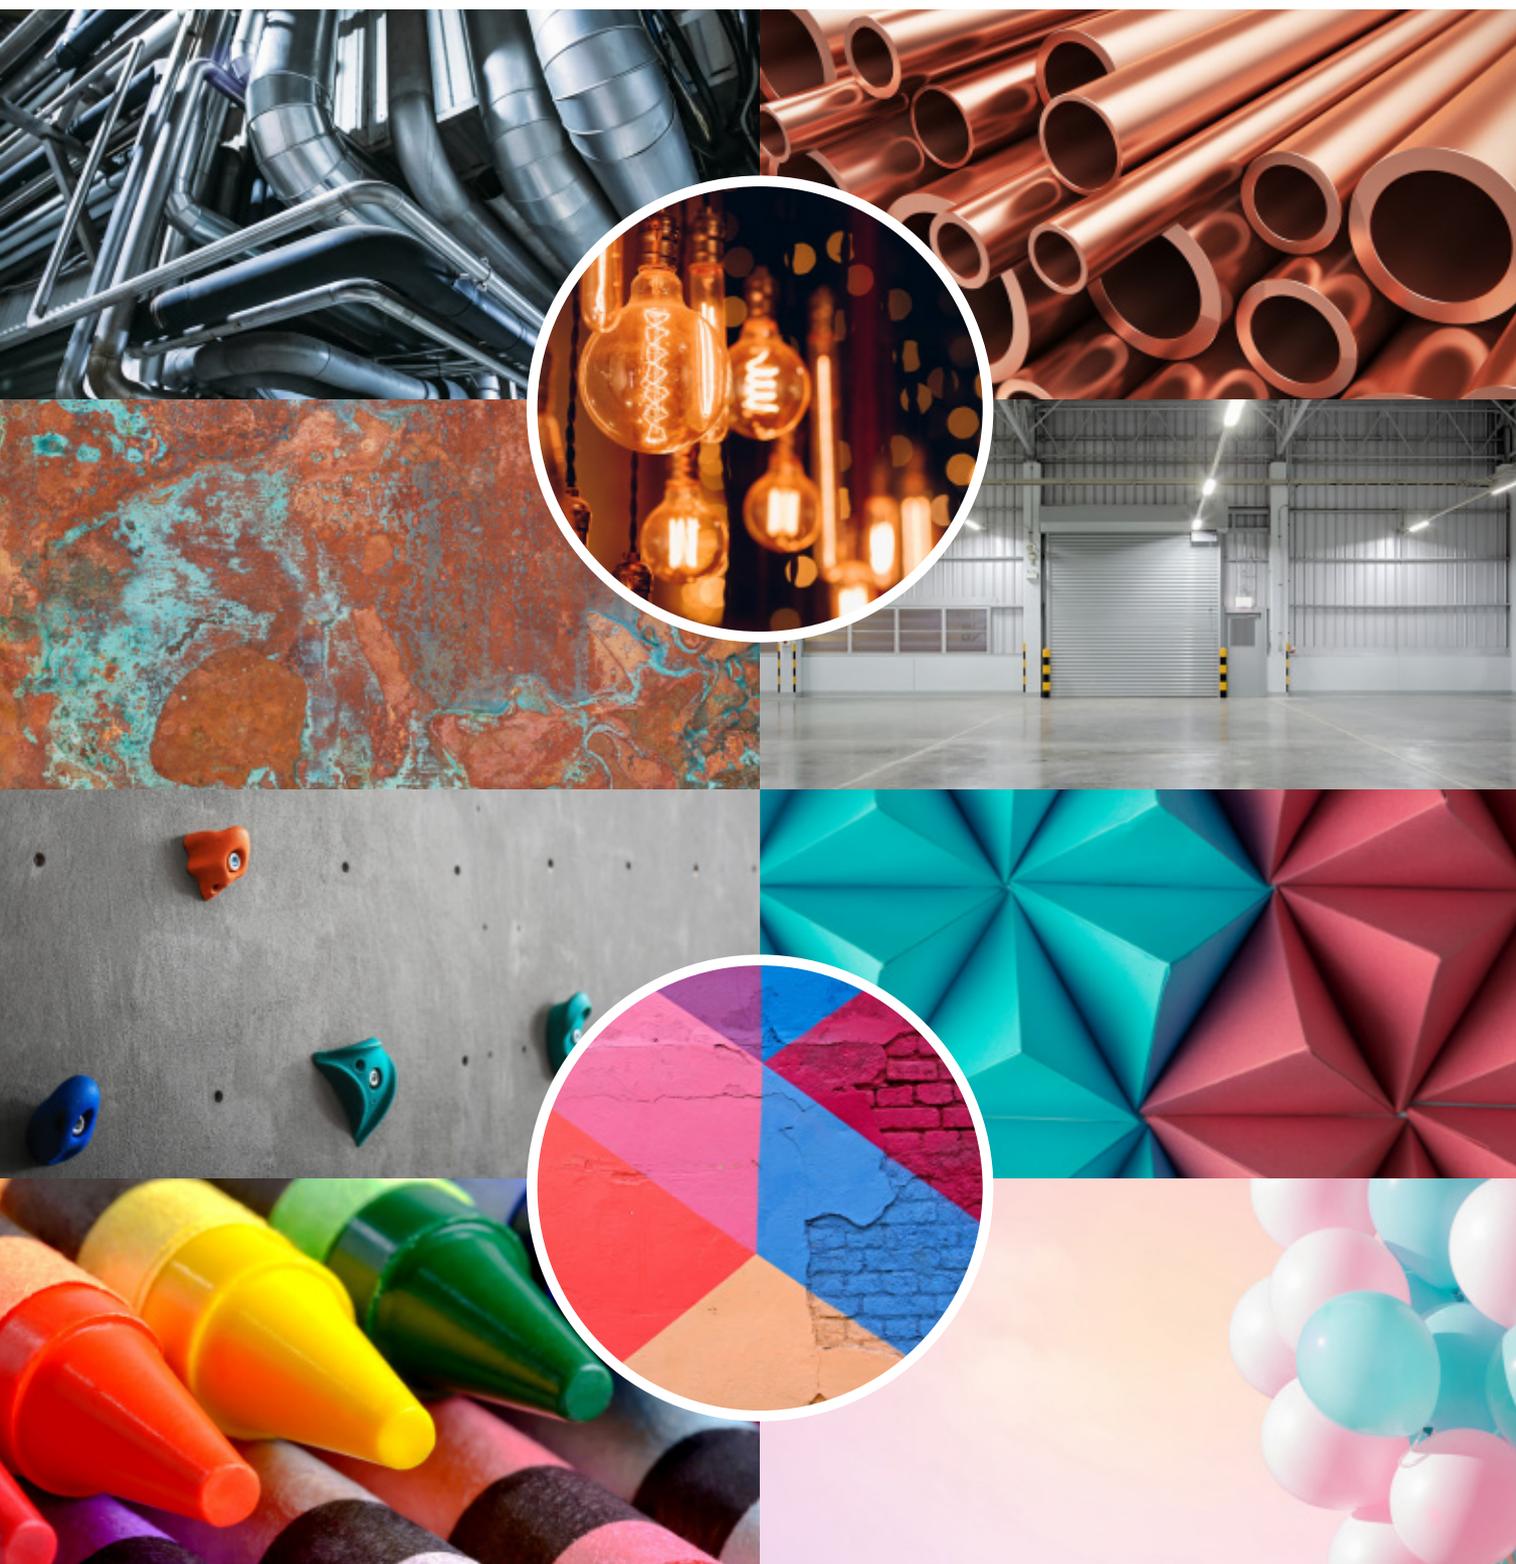

### Optional hatches

## Space to think big, or small

Nordic, natural, colourful, industrial or your own unique blend? Colours, shapes, textures and materials help you create the right atmosphere.

## It all starts at the drawing board

Collaborate's hard-wearing quality and classic design means your table will last a lifetime. The product complies with the Nordic Swan Ecolabel's criteria for raw materials such as wood, metal, plastic and chemicals. The metal parts are thin, designed to reduce material consumption. Collaborate has been approved under

Möbelfakta criteria on quality, the environment and social responsibility.

At EFG we are constantly striving to minimise our environmental footprint and to use energy and resources as efficiently as possible. We set high standards for ourselves and for our suppliers when it comes

to the environment and working conditions. We take care in choosing materials that fulfil current ecolabelling criteria. We have ambitious environmental objectives and constantly monitor them to improve our processes. Read more about EFG's work on sustainability in our sustainability report.
