

Tab S

WALL SCREEN

Tab S is a flexible screen with enhanced sound-absorbing properties that improves both acoustics and focus — without taking up space. It can be used to create privacy, reduce visual distractions, and support personal organisation. With Tab S, you don't just improve the sound environment — you create clearly defined zones in flexible workspaces. The screens can be customised in height and width on request. Tab S comes with full documentation of its acoustic N10 rating (sound reduction).

MODEL	Wall screen, acoustic
CONSTRUCTION	The total thickness of the screen may vary slightly depending on the choice of upholstery. The frame is made of 16 mm wood fiberboard with a total of 20 mm cold foam padding. Angle brackets for fixed mounting under the desk are made of 4 mm steel sheet. Functional rail in extruded aluminum.
DIMENSIONS	Height: 650 mm Length: 1200 mm Depth: 45 mm
WARRANTY	5 years
